THE

FIBONACCI 5.8.13

NEW SIRIUS CYCLE 29

13-MOON²⁸, 28-DAY TRANSITIONAL CALENDAR

Change the Calendar. Change your Mind. Change the World.

Declaring the End of Artificial Time and Shifting from Fear to Love.

*"Since the advent of the Nuclear Age, everything has changed but the way people think,
thus we drift towards unparalleled catastrophe."*

-ALBERT EINSTEIN-

*"To change how people think we must take a profoundly simple and universal element of everyday life, one in which all everyday thinking is rooted, and change it so radically that the way in which people think will itself be dramatically changed. If you want to know that something has really changed, change the calendar! This is the meaning of the replacement of the Gregorian calendar by the **Thirteen Moon Calendar**. The calendar change is necessary because, as the pragmatic application of the discovery of the Law of Time, it brings into focus the essence of this discovery: Time is a frequency, the frequency of synchronization. If a calendar does not increase synchronization, it is not performing its highest function. This is the fundamental critique of the Gregorian calendar and of all concepts of time based solely on physical, third-dimensional astronomical measurements. This discovery is so new and startling that it affects all human thought and is a matter to which all belief systems, religions, and methods of science must be cognizant. Yet nothing, it seems, is more difficult for humanity than to make this change from a manifest disharmony to a manifest harmony.*

Historical man recoils at the prospect of actual harmony in natural time. This is because historical man defines his existence and thrives upon the dis-harmonies of his own invented time. The Gregorian calendar keeps the human mind entrained in a diabolical disorder of meaninglessly named months of uneven measure, while every day is tracked and driven by a relentless mechanism called a clock. This immersion of the mind of historical man in the frequency of his own artificial time, more than any other factor, condemns him to a world of inescapable horrors: traffic jams, poverty, terrorism, unresolvable historical and territorial disputes, global warming, environmental degradation, social disorder, insanity, and drug abuse. The problem of historical human-Homo historicus is compounded by the unconscious nature of his acceptance of this timing sensibility, believing it to be the actual nature of time. Hence, all his public and economic policies are driven by and determined by the relentlessness of this perception that time is an arrow blindly pulling him into a future in which his only defense is the creation of more technology, the technosphere itself being a pure expression of the application of the mechanization of time."

Jose Arguelles

Time and the Technosphere: The Law of Time in Human Affairs

WHAT IS THIS CALENDAR?

Have you ever considered the effect the current 12-month calendar is having on our human beliefs, customs, actions, choices, behaviors, and actual relationship with time? Could humanity benefit by simply attuning our daily activities to a natural, harmonic standard of 13 Months/Moons of 28 days each?

The Gregorian year is finishing with our planet in crisis. It's time to formulate our new year's resolutions, so we can change the script in 2017... How about shifting our whole experience and perception of time altogether? This is the best time to make the shift from artificial time to natural time and experience more harmony individually and collectively. The calendar you just downloaded is the product of the need to generate creative solutions for the challenges the planet is now facing. As we keep witnessing the progressive awakening of humanity go hand in hand with a deep cleansing of human relationships at every level of modern society, we need more than ever think outside the box. This means to think outside the confines of a dying materialistic paradigm based on an erroneous and arbitrary timing measure that is at the core~root of it.. Inspired by the legacy of two human beings (George Eastman Kodak and Jose Arguelles) who also dedicated their lives wholeheartedly to change the current civil calendar we use today, a group of concerned human beings came together to protect and safeguard the most sacred and transcendent of all rights: Our right to know the truth about time and the calendar we use to program our lives and our right to live in right relationship with all life.

After experiencing for years the profound shifts in our perception of the world via the application of 13-moon, 28-day calendar on our daily lives, we determined it was our responsibility to take concrete steps to do our part in helping to eradicate the ignorance and the pervading erroneous perceptions about time that are putting all life on Earth in danger and the human species at the edge of self-destruction. In this way the **Global Council of Calendar Awareness (GCCA)**, an autonomous educational and cultural platform, was born earlier this year. Our mission is to:

1. **Educate Humanity at a global scale on the effects of calendars on consciousness.** Our goal is that humanity includes this crucial subject as a TOP priority on the list of current global challenges that include increased state of war & violence, rampant human rights violations, social and racial disparity, GMO food production, water contamination, global warming, hunger, species in danger of extinction, just to name the most pressing issues...
2. Re-Introduce the 13-Moon x 28-Day +1 Matrix as the most basic and practical application of the Law of Time.
3. Find avenues for collaboration and collective agreement on HOW to universalize, expedite and simplify an educational process at a global scale.

The purpose of this distilled version of the **“original” 13-Moon, 28-day calendar** introduced by Jose Arguelles in 1992, is to offer it as a simple and powerful tool that can serve as a **BRIDGE** to assist the human family in **transitioning** from centuries of subjugation to the current erroneous civil standard toward a burgeoning choice point, whereby we are catalyzed to establish a new harmonic standard for timekeeping that promotes greater access to our inherent creativity and capacity to live in right relationship with each other and the planet. The conditions for change are ripe, now more than ever. We do not have the luxury to ignore this clarion call. Our lives and the lives of generations yet to come depend upon our willingness to do what must be done. Harmony, balance, and synchronicity is what we have to gain. **Adopting a new calendar means a new society and a new way of doing things.**

We are used to wait for local and global institutions to approve/dictate a new law/calendar... The proactive choice now is to change the calendar yourself. That's right. The way to change the old paradigm is to begin to live by a timing standard that is a harmonic reflection of the cycles of nature. ***The 13-Month, 28-Day Calendar Awareness Campaign is a people's movement, synchronized with Nature's movement, to restore harmony and peace on Earth. This movement is destined to usher a Calendar Referendum for the year 2020, when a new collective choice point can be reached to implement a new timing system based on the accurate measure of the actual harmonic principles governing the astronomical cycles governing the Earth.*** The Global Council for Calendar Awareness (GCCA), working in collaboration with the Foundation for the Law of Time (FLT), **invites people of goodwill and conscience everywhere on Earth to adopt the 13-Moon/Month, 28-Day Calendar as their new standard starting January 1st, 2017. It's Time to stART again...**

WHY IS THIS IMPORTANT? WHAT DIFFERENCE CAN YOU MAKE?

We must understand that the artificial operating system we have lived under for more than four centuries has contributed, more than anything, to the enduring and increasing chaos perpetuated throughout the planet, affecting Mother Earth (the Biosphere), in ways we have been conditioned to simply ignore. No longer can we afford to remain ignorant. And, we do have a choice! Please join the people's' movement to establish the 13-month, 28-day calendar as the Harmonic Standard by Magnetic 1 (July 26), Blue Lunar Storm Year (2020) - NS1.33.1.1.119

ROAD TO CALENDAR REFERENDUM 2020: HOW CAN YOU HELP?

1. CHANGE YOUR CALENDAR. The gregorian year is finishing. It's time to formulate your new year's resolutions. How about shifting your whole experience and perception of time altogether? This is the best time to make the shift from artificial time to natural time and experience more harmony individually and collectively. Let's elevate our perceptions of time by making the conscious choice of integrating the harmony of the 13 month X 28 day calendar with the Gregorian 12-month calendar until we change the program altogether. As more people switch their minds to attune to a natural harmonic standard, the underlying basis of practically everything we know in society will start to change. The more human beings whose minds and bodies are attuned, the more harmony we will be able to experience individually and collectively in the world.

Changing the calendar is the Untried Solution. It is to stART again.

As part of this 4-Year calendar awareness campaign to 2020,, GCCA and FLT have been introducing a FREE **"New Time Educational KIT"** and offering it as The Gift of Time during this most special and meaningful time of the year around the Earth. This educational kit is comprised by 3 PDF documents and 3 basic principles:

INSPIRATION: [Stopping Time: A 13 Moon Primer](#) (Booklet)

MEDITATION: [13 Moon Self Study Pilot Program](#) (Manual)

PRACTICE: 13-Month X 28-Day Transitional Calendar (WorkBook/Planner)

Print a copy of this PDF, create your own wall almanac and display it where more people can see it. To print your copy, follow the instructions on the last page of this document.

Benefits of the New Calendar

1. It will expand your perception of the world. That is because its perpetual harmony is coordinated by the synchronic order.
2. It will increase your daily awareness. All you have to do to learn the synchronic order is to pay attention.
3. It will create more synchronicity in your life. The synchronic order is the order of reality organized by time. It is synchronic because everything is synchronized! All there is is synchronicity!
4. It will create more Order in your life/mind. Daily use of the harmonic 13:28 matrix naturally entrains your mind into higher levels of order.
5. It will increase your attunement to Nature. Use of the 13 Moon calendar will not only attune you to natural cycles, but it will also equip you with a new lens to view all aspects of your life and relationships.
6. It will expand your imagination . Follow the 13 moon calendar faithfully for 28 days and note what new perceptions, dream insights and creative ideas that might occur.
7. It will increase your intelligence. Within 52 weeks (one year) of using the 13-Moon calendar you will advance in intelligence, free dormant mind power, and increase telepathic "knowing".
8. It will increase your awareness about the patterns of your life. By making conscious the patterns in our life we can see how a calendar affects our mind.
9. It will increase your sense of wholeness. Living by the synchronic order you can begin to assemble the pieces of your life to see the whole pattern.

As with anything in life, the more energy you put into learning the new language of time, the more accelerated the learning. Now is the opportunity to dispel fear and merge back into the Original Pattern that connects us directly with the Galactic Whole.

2. SIGN THE PETITION FOR CALENDAR REFERENDUM. Calendar Reform is essential to the rights of human beings and Nature, because by harmonizing with the natural cycles of time we can restore human mental health and harmony in relation to the 'circle of life.' Beyond all ideologies, a correct measurement of time is a basic unifying factor of a sane and self-aware civilization. How can we have a healthy civilization based on a crooked measurement of Time? Let's dissolve the macro-organizing principle responsible for the planetary biospheric emergency we find ourselves in, and lay the correct foundations for world peace, regenerative culture, and natural harmony. To [sign and support this open petition for Calendar Referendum 2020](#) and Declaration of Universal World Peace, and to ensure that humanity adopt and implement the 13-Month, 28-Day Calendar as a new Harmonic Standard by 2020, please go to:

<https://www.change.org/p/un-secretary-general-calendar-referendum-2020-declaration-of-universal-world-peace/>

3. BE PEACE! The 13-Moon/Month Calendar is a PEACE INITIATIVE. It is deeply inspired by the values promoted by the Banner of Peace. "Where there is peace, there is culture. Where there is culture there is peace." (Nicholas Roerich)

4. DONATE: If you appreciate this initiative and would like to see it to continue, please donate any amount you feel inspired at: www.calendartruth.info/donate
Your contributions will help establish a Galactic Culture based on LOVE, PEACE, ART & SYNCHRONICITY on Earth.

5. SHARE YOUR TIME. . We are now looking for time donors who feel inspired to help in the areas of Social Media/Content Management, Crowd Funding, Filming-Editing, IOs APP Development, and E-Mail Marketing. If you feel inspired to help by donating your TIME for the benefit of the planet, our contributing in any other way, please drop us a note at info@calendartruth.info.

6. SHARE THE INFORMATION. If you find this information revolutionary, inspiring or useful, please do your best to share it online via your favorite social media outlets. Bring the subject into everyday conversations with family, friends or co-workers. The more we talk about this, the more it will become a reality

7. CONTACT US. The Global Council for Calendar Awareness (GCCA) is conformed by a group of concerned human beings who came together to protect and safeguard our right to know the truth about time and the calendar we use to program our lives and our right to live in the right time. Contact us with any questions, ideas or inspirations: info@calendartruth.info /calendartruth@gmail.com THANK YOU!

"The 13 Moon, 28-day calendar is a new standard of time for all people everywhere who desire a genuinely new world.

If the calendar and time we follow is irregular, artificial and mechanized, so becomes our mind. As is our mind, so our world becomes, as is our world today: Irregular, artificial and mechanized. But if the calendar we follow is harmonic and in tune with natural cycles, so also will our mind become, and so we may return to a way of life more spiritual and in harmony with nature." - José Arguelles

*"The superior person sets the calendar in order and makes the seasons clear."
- I Ching, Hexagram 49, Revolution*

Magnetic Moon

Month/Moon One: The Magnetic Moon of Purpose • Magnetic 1 - 28 = July 26 - August 22

The calendar is the most fundamental organizing principle of human society.

The highest purpose of a calendar is to harmonize the mind with nature, to measure natural cycles in time, to coordinate and regulate society, and to place its society in a state of harmony and synchronization with the biosphere, and with itself. It is the societal operating system, the most fundamental organizing principle of human society.

If a calendar does not synchronize its society with the cycles of nature, then it is not performing its highest function.

A calendar is an artificial construct whose primary purpose is to be the fundamentally synchronizing and coordinating operating system for human society. We also use it to keep track of natural cycles in time, most commonly to keep track of the passing of days and years. But even though we group our days into sets of seven and call them weeks, and even though so many of our planned activities are weekly activities while many others are monthly activities, we are far too accustomed to a system that does not coordinate our weekly activities with our monthly activities. This is simply because the 12-month calendar that we use doesn't coordinate weeks with months. And this is only because each month isn't a whole number of weeks, such as four.

Time is the atmosphere of the mind.

It must be understood that an irregular standard of measure has a profound effect on the mind, especially an irregular standard of measure of time. This is because time is a mentally perceived

phenomenon, unlike space, which is perceived through the senses. We perceive time with our minds, not with any of the five basic senses.

Our consciousness and society are greatly affected by the calendar that we use.

Because time is mentally perceived, the calendar creates constructs of the mind. A society's calendar, its regulating, coordinating operating system, creates individual and collective constructs of consciousness within that society. So in many ways, the calendar that a society uses affects the very structure of that society.

A calendar should harmonize the minds of its people with their biological nature.

Because the 12-month calendar does not measure the 4-week, 28-day average cycle of the Moon, the biological, menstrual cycle, our primary societal constructs of consciousness, inclusive of our habits, customs, and belief systems that form most of the structure of society, are out of tune, dis-synchronized with the cycles of nature, creating a mental-biological disconnection on individual and societal levels of consciousness.

Our minds are cramped by living within the erroneous time construct known as the Gregorian calendar, the societal operating system used worldwide today.

The 12-month Gregorian calendar has little to no relevance to any natural cycles. It interrupts the natural, intuitive flow of consciousness, with glitches in the operating system, such as not knowing the day of the week while knowing the

day of the month, and not being able to calculate weeks according to months. For example, if it is Friday July 22, do you know what day of the week August 22 will be? If it is January 15, how many weeks is it until October 15? Is it a whole number of weeks? How many weeks is five months? How many months is 32 weeks? Eight?

Using the 13-month, 28-day calendar, when you know the day of the month, you know the day of the week.

Four weeks = one month aka one 28-day moon. *Keeping the same Gregorian days of the week*, the 1st, 8th, 15th, and 22nd are always Sundays; the 2nd, 9th, 16th, and 23rd are always Mondays; the 6th, 13th, 20th, and 27th are always Fridays. July 4 would always be a Sunday, because it is always Cosmic 8, and the 8th is always a Sunday.

The Gregorian calendar is inherently problematic for human consciousness.

Any standard of measure that is irregular is inherently problematic. If such a standard of measure is used to measure time, it is a problem for worldwide human consciousness. This is the fundamental critique of the Gregorian calendar.

Calendar change is peaceful revolution.

To take something that is used daily, throughout nearly the entire world, and change it at its root, would change the way people think globally. The replacement of the Gregorian calendar by the 13-month, 28-day count as the new civil standard on Earth is a truly earth-shaking, but peacefully unifying, revolution.

- Albert Einstein

Lunar Moon

Month/Moon Two: The Lunar Moon of Challenge • Lunar 1 - 28 = August 23 - September 19

The Gregorian calendar is problematic.

1. The Gregorian calendar divides 365 days into 12 unequal months -- four months of 30 days, seven of 31 and one of 28 or 29 days, creating a calendar that is like a ruler with unequal inches.

2. The Moon revolves around Earth 13 times each year, not 12, approximately every 27.3 days. This is known as the sidereal cycle of the Moon. The full moon cycle is approximately 29.5 days, known as the synodic cycle of the moon. A nice moonly average is 28 days. The Gregorian calendar months reflect none of this truth.

3. 'Calendar' is derived from 'Calends', the latin name for the first day of the Roman month, which was the day when monthly debts were paid. Is it any wonder that modern society is ruled by the concept, "Time is money"?

4. The month names are illogical. September means seven, but it's the ninth month; October means eight, but it's the tenth month; November means nine, but it's the eleventh month; and December means ten, but it's the twelfth month.

5. Day-date calculations are difficult because the months are not each a whole number of weeks. (If today is Wednesday, July 26th what day of the week will August 26th be?) There is an immediate mental block, a numbing of the mind, you have to stop and think about it.

6. Because the number of workdays per month varies, business statistics are often misleading.

Why do we use the Gregorian calendar?

The two most significant calendar reforms in history were the Julian Calendar of 46 BC and its successor, the Gregorian calendar, in AD 1582. Julius Caesar converted Rome from a republican to an imperial form of government. His calendar became the basis of imperial dominance. In 46 BC, the 445-day year of confusion that attended Caesar's reform was matched by the second significant reform, the Gregorian, in 1582, in which ten days were "lost forever," October 4-15, so the calendar could catch up with the Sun. Why should we continue to base the structure of our society on this crooked and illogical system?"

Calendars are instruments of control.

Throughout human history, calendars have been the primary instrument by which a society is regulated and controlled. In prehistoric Egypt, the calendar tracked the annual flooding of the Nile, because it determined when a layer of soil would be available for planting. Those who created the calendar to track this were those who maintained control over their society, for the Egyptian people depended on the calendar keepers for their most basic needs, such as knowing planting times for agriculture. Anything that a people relies on for its essential needs can easily become an instrument of societal control. Bishop Diego de Landa, who ordered the burning of Maya texts in the 16th century, admitted that calendars are instruments of control, "They made a sort of calendar with which they ruled themselves, not only for their feasts, but also for their accounts, commerce and businesses, as we rule ourselves with ours."

Calendars are programming devices.

In countless, subtle ways, society is defined, regulated and coordinated by the calendar that it uses. All of the beliefs, customs, and institutions of society are *programmed into* its calendar. So to structure a calendar for a people is to structure its society. Whether it is chosen or not, the calendar a society uses becomes its macro-programming operating system.

We did not choose this nonsense.

The legal code of the United States does not specify an official national calendar. Use of the Gregorian calendar in the U.S. stems from The British Calendar Act of 1751, which specified its use in England and its colonies. The Gregorian calendar reform of 1582 was adopted initially by the Catholic countries of Europe.

Confusion is often intentional.

And power is often corrupt at its deepest levels and applications. In this case, the applications have created confused collective consciousness and an imbalanced society that is disconnected from nature. It is not surprising that the Gregorian calendar has become the standard of global civilization, for global civilization itself is the triumph of the artificial over the natural world. We are truly the one species that has become alienated from nature, subconsciously captured by this intentionally flawed program, because our time sensibility has been captured by instruments of insensible, artificial measure. It is to the correction of this destructive momentum that all efforts of calendar reform must now be directed.

- Mahatma Gandhi

Electric Moon

Month/Moon Three: The Electric Moon of Service • Electric 1 - 28 = September 20 - October 17

The 13-month, 28-day calendar serves humanity with a societal operating system of harmony and synchronization.

In reviewing the quirks and twists of history that constitute the Gregorian calendar, we must ask, why do we continue to use such an instrument, and what are its effects? Is a calendar something more than a tool for scheduling the payment of debts, or is it an instrument of harmony and synchronization? The harmony or disharmony of time is a profound matter rooted in the instrument of time reckoning that we use. There can be little question that we live more in a time of chaos than of harmony. We may also say in regard to the effects of standards of measure on the mind, that the chaos of the time in which we live is embedded in the calendar we use. If we are to leave this time of chaos and enter a time of harmony, then we must exchange the instrument in which the chaos is embedded for an instrument that is the very model of harmony, the 13-month, 28-day calendar.

The League of Nations proposed calendar reform in 1923. The 13-month, 28-day calendar was chosen over 184 others.

It is important for us to remember that during the first half of the 20th century, a vigorous and well organized calendar reform movement flourished. George Eastman of Eastman Kodak organized a great campaign on behalf of The International Fixed Calendar, a perpetual calendar (same every year) with 13 equal months of 4 weeks (28 days) each, comprising 364 days, and with the final 365th day held not in any week or month, often known as a "Null Day" or "Zero Day," so that the first day of the year is always the first day of the week, Sunday. In

the United States alone, over 100 industries adopted this perpetual calendar. (Kodak used one until 1989!) This was all in response to the League of Nations' proposal for calendar reform. 184 calendars were submitted. Two were voted upon. One would have equal quarters, but not equal months. (The 13-month, 28-day calendar has equal quarters, as each quarter is simply 13 weeks.) The other, the 13-month, 28-day calendar, was supported by the International Chamber of Commerce and several other chambers of commerce. It received well over 90% of the votes. But the Vatican did not approve.

The Vatican was opposed to the 13-month, 28-day calendar in the early 20th century.

The League of Nations announced that on January 1, 1933 we would return to 13 months of 28 days each!! But Vatican resistance to this simple and logical calendar focused on a campaign against the "Null Day." They argued that a break in the succession of the seven-day week would create chaos and calamity. George Eastman, one of the most well known 13-month, 28-day calendar proponents, was murdered in his home within one year after the Vatican stopped the change.

This incredible calendar story has been swept under the history carpet for far too long!! We now carry the Eastman-Arguelles torch of 13-month, 28-day calendar change on Earth!!

Calendar change is autonomous power.

"Following the defeat of all efforts of calendar reform in the first half of this century, the Gregorian calendar has had a half century reprieve. Humanity must now walk out on its own and experience a Day Out of Time, no day of the week at all, not as chaos, but as the beginning possibility of relieving all debts and creating an atmosphere of forgiveness and reconciliation, where peace may be practised as the proliferation of art and culture once again. This idea of calendar change is so simple and yet so revolutionary that most people do not perceive its power. But when you consider that virtually all existing institutions are incorporated in the Gregorian calendar, this means that their sovereignty is also incorporated in the Gregorian calendar. To change the calendar means to disincorporate all institutions. All sovereignty in time would have to be renegotiated." - Jose Arguelles

Calendar change is peaceful use of free will.

The World 13 Moon Calendar Change Peace Movement was begun by Jose and Lloydine Arguelles in 1995, and led by Jose Arguelles and Stephanie South from 2004 until Jose's passing in 2011.

It is always we, the people, who must change the calendar. It doesn't take an act of parliament. All it takes is an act of will on our part. We call for unification of all, organized on the 13-month, 28-day standard of timekeeping, a revolution in time. The calendar we choose to use is ours. It is collective, for our coordination with each other. And it is individual. No one can ever take it from you.

*"The accurate measurement of time is a measure of the intelligence of man. A sense of the importance of time is a measure of man's morality."
- Lawrence Fawcett*

Self-Existing Moon

Month/Moon Four: The Self-Existing Moon of Form • Self-Existing 1 - 28 = October 18 - November 14

A society is defined by the calendar it uses.

And 28 days is the biological cycle of creation.

With conscious attention to this cycle, in a multitude of ways throughout society, our minds are attuned to our biological cycle, therefore redefining society, as our actions and belief systems also become biologically attuned.

Your change in time will change your mind. On Earth, tune it to the Moon and to the Sun.

The 13-month, 28-day calendar is a calendar of harmony. When we talk about calendars, we ask, "What is the Gregorian calendar actually doing for us?" A true calendar would have to take into account the relationships, which we experience in time, between Earth, the Moon, and the Sun, within this galaxy, the locally whole system in which we are functioning. While it may appear that a calendar keeps the order of time in sequence, the calendar also has the function of synchronization, and this, at minimum, should take into account the actual cycles and patterns of lunar, planetary, and solar movement that are continuously a creative, influential, and evolutionary part of our earthly existence. Time is of the mind. Everything follows from Mind and Spirit.

There are many lunar and solar calendars.

There is much confusion about the nature and history of calendars. There are many different kinds of calendars that have been used by humanity. The many different solar calendars, each of which have measured the vague 365-day year, include the still current Gregorian calendar, which measures the year with a leap day system included, and Egyptian

calendars that had 12 months of 30 days each plus five days at the end of the year. There are basically two types of lunar calendars. One is the 13-month, 28-day calendar, which is actually a solar-lunar calendar, because it measures both the 365-day year and also the average lunar cycle of 28 days.

The 13-month, 28-day calendar is an equal standard of measure of natural time.

The 13-month, 28-day calendar has equal units of time measure, equal "months," or in this particular case of 28 days, perfectly equal, 4-week "moons." This calendar was used by various cultures in prehistory, and it is still used by many cultures today, even dolphins who mark the 28-day cycle on their teeth! It is clear that these cultures lived in a much greater harmony than what we now know.

If we would simply take the final 365th day at the end of the solar year and place it *not* in any week or month, as the transition from one solar cycle to the next, the remaining 364 days would divide equally into 13 months of 28 days each, creating a perpetual calendar system. This would place human society, including countless customs and procedures, in resonance with the natural timing of the Moon *and* with the natural timing of the Sun. This includes the benefit of having 13 28-day months synchronized with the 13 orbits of the Moon around Earth each 365-day year. 364 divides by 2, 4, 7, 13, 14, 26, 28, 52, 91, and 182, offering a great deal of optional, mathematical 'space' for organization, with many ways to establish periodic regularity, as long as there is a 365th day to rest, like an extra Saturday, at the end of the year.

This is the Day Out of Time, always July 25, an official holiday in Sao Paolo, Brazil and in Atlanta, Georgia.

The synodic full moon cycle is *not* 28 days.

The other kind of lunar calendar is what we call the "lunar calendar." The lunar calendar is based on the full moon, *synodic cycle* of the Moon. It measures the Moon as it is seen from Earth, not from the Moon. The other cycle of the Moon is the *sidereal cycle*, the measure of the Moon's revolution around Earth, regardless of moonlight. The synodic cycle is approximately 29.5 days. The sidereal cycle is approximately 27.3 days. 28 days is an approximate lunar average, a blessing for humanity, Earth, the Moon and the Sun, simply because it is four weeks.

Using the 28-day "lunar average," there was in prehistory a great, common planetary wisdom to have devised a 13-month, 28-day calendar.

13 months of 28 days has been used for thousands of years by many cultures.

These cultures include the Druids, Polynesians, Egyptians, Hebrews, Essenes, Maya, Inca, Lakota, Cherokee, and peoples throughout what is now Russia and South America. It is common knowledge that has been intentionally hidden from us. Air is the atmosphere of the body, and time is the atmosphere of the mind. Today's Gregorian-minded culture is based on 12 unequal months and days regulated by the clock, a deeply and unconsciously embedding, mechanized irregularity of time. 13 months of 28 days establishes sensible, mental-biological culture.

"If the Gregorian calendar was to be offered as a new device for measuring time, we, with our present knowledge, would reject it as something utterly impracticable, lacking in harmony and order, unbalanced and irregular, too clumsy a calendar to make calculations by."
- B. Richmond, "Time, Measurements, and Calendar Construction"

Overtone Moon

Month/Moon Five: The Overtone Moon of Radiance • Overtone 1 - 28 = November 15 - December 12

Messenger of the Prophecy of Pacal Votan, Jose Arguelles discovered the Law of Time.

Dr. Jose Arguelles was born in Rochester, Minnesota to a German-American mother and Mexican father. He greatly understood the complex Maya calendar systems, and dedicated much of his life to understanding the Maya, their purpose on Earth (to help humanity to re-harmonize itself with nature), the Maya Calendar, and the cycle of history as defined by that calendar system. Arguelles initiated the Harmonic Convergence of 1987 directly because he understood the Mayan prophecy of 13 Heavens and 9 Hells, based on the twenty-two 52-year cycles that ended August 16, 1987. After writing several books about the Maya in the 1980s, in 1991 he formulated a direct relationship between energy, art, time, and synchronicity, the Law of Time, expressed as "Energy factored by time equals art," while also, that same year, deciphering the prophecies and codes of time of the Chilam Balam (Maya prophet lineage) and producing a timing system, the 13 Moon Calendar, based on the 13-month, 28-day calendar and the 52-year Mayan Calendar Round, which also tracks the 260-day sacred Maya count of the Tzolkin.

Jose Arguelles was the world's modern day 13-month, 28-day calendar change leader

Although many misunderstood him to be purely a Maya Calendar scholar and author, Jose Arguelles was profoundly the world's modern day leader for 13-month, 28-day calendar reform. Jose consistently

travelled the world, speaking about the 12:60 timing frequency of human society, based on its 12-month calendar, and 60-minute clock. He and his wife, Lloydine Arguelles, initiated the World 13 Moon Calendar Change Peace Movement in 1995. This movement's basis is the Telektonon Prophecy of Pacal Votan. (Please see Cosmic Moon.)

The Law of Time: $T(E) = \text{Art}$ Energy factored by Time equals Art.

The discovery of the Law of Time was the result of the investigative research of Jose and Lloydine. After years of research on the Maya calendric system, Jose Arguelles had concluded that the scientific superiority and galactic sophistication of this system was due to the fact that it is based on an entirely different standard of measure and mathematics than any of the time keeping devices now known, or in worldwide use, today.

Nature is supreme and a function of fourth-dimensional time, the Law of Time affirms.

According to the Maya perception of time, time is the universal factor of synchronization. Time is the fourth dimension. It is time that synchronizes everything in third-dimensional space. It governs all third-dimensional phenomena. The Law of Time takes the form of an equation: $T(E) = \text{Art}$.

The 13-month, 28-day calendar is a perfect expression of the Law of Time.

All Maya calendrics and mathematics subsume the Law of Time, but it was not the Maya's concern or need to articulate the basis of their science and belief system, only to apply it. Albert Einstein and all other researchers have been unable to formulate the actual law of fourth-dimensional time. Einstein said that if he could do it all over again, he would have examined more the nature of time, as opposed to concepts of space.

The mathematics of fourth-dimensional time are a totally different construct from the mathematics of third-dimensional space. It is absurd to apply measurements of space to define qualities of time. This was the root error of the 12-month calendar and the mechanical clock: mistaking the measure of time for divisions of a circle in space. The mathematics of fourth-dimensional time are separate from virtually all of the mathematical systems in use today, which are based on the mathematics of space.

The discovery of the Law of Time is a genuine new knowledge. The basis for understanding the Law of Time is the 13-month, 28-day calendar.

We give our endless gratitude to Jose and Lloydine Arguelles, for their monumental work! Thanks to their endless efforts, the 13-month, 28-day calendar is currently used in over 80 countries worldwide!

"Music is behind life, and rules life; from music springs all life. The whole of creation exists in rhythm, and in a general phrase, it may be said that there is one common source of human disease, and that is disorder in rhythm."
- Hazrat Inayat Khan

Rhythmic Moon

Month/Moon Six: The Rhythmic Moon of Balance • Rhythmic 1 - 28 = December 13 - January 9

Real time, time of nature, is synchronicity.

To synchronize means to coincide in time, to occur at the same time, or more specifically, to occur at the same moment in time. When musicians are creating musical notes at the same moment in time, they often intuitively say, "We're *in* time," as if time itself is synchronicity. In nature, in reality, time is.

The subject of synchronicity was first introduced to the world by Carl G. Jung, who explained that events, if they occur with no causal relationship, are "meaningful coincidences" in time. And from the Maya perspective, time is the universal factor of synchronization. Time is that natural entity that continuously holds everything in synchronicity, everything that *occurs* in third-dimensional space. In contrast, one might say that certainly not every occurrence in time is an occurrence at the same time. Things do happen at different moments in time. Yet when one stops to think about it, isn't the time always right now, this one now moment? With this perspective, this idea, that time is the fourth-dimensional entity that synchronizes all of third-dimensional space, begins to make sense.

As Jose Arguelles would say, "When we look at the Moon, we don't see two moons." The Moon is always synchronized within this moment in time, so that even as it revolves around Earth, with momentum and gravity and more involved, it is never in a different time. It is always with us now. This is the simple synchronicity that we take for granted and hardly notice, because it is always present. It is a very simple, natural law.

The Law of Time is the law of synchronicity.

And the Synchronic Order is the order of time.

What is often referred to as the Synchronic Order is simply the order of synchronicity. It exists whether we are conscious of it or not. As we become conscious of the Synchronic Order, the frequency of synchronicity in our lives increases exponentially. When one uses a calendar that is based on the cycles of nature, many aspects of the Synchronic Order that were previously unconscious become conscious. And one also becomes conscious of the disharmonious timing of the 12-month calendar.

The 28-day moon, the biological cycle of woman, is also the measure of the cosmic, telepathic cycle common to all humanity. Due to conditioned living by erroneous and artificial timing standards, humanity has undergone an erosion of its primal telepathic abilities. By returning to the biologically correct timing of 13 moons of 28 days, the principles of telepathy can also be reintroduced to, and hence reactivate, human consciousness.

Even if telepathy is not seen as a reality or not held as an intention, there is still no doubt that conscious use of such a harmonic template of time as the 13-month, 28-day calendar harmonizes the mind to be in synchronicity with the cycles of nature. To organize our daily, weekly, monthly, and yearly activities, with whole numbers of these cycles fitting nicely within each other, we can individually and collectively organize our minds on a simple, sensible, harmonic standard of time, the natural time of 13 moons of 28 days.

"All life on Earth, including the rhythms of our body, are influenced by the rhythms of ever-changing combinations of celestial movements." - Eden Sky

In order to be in balance and harmony with the universe, with all of nature, we must begin at the heart center core of our present physical reality in time. We are here on Earth with one moon and one sun, within this one of many galaxies. Here on Earth, our closest neighbor is the Moon. Our trinity is the Moon, Earth and Sun. May we harmonize our minds, so that we may harmonize our activities, here on Earth, with the Moon and with the Sun. This requires a calendar for this world that honors the movements and cycles of time of these heavenly bodies. May we be consciously in balance and in harmony with the Moon and with the Sun.

There is just one way to establish a lunar solar society. It requires a lunar solar calendar, and there is only one that makes any sense at all. The only way to structure a solar calendar for this planet that has equal units of measure which correspond, represent, replicate, or approximate the cycles of its only moon, as in the approximate 28-day lunar average, is to organize our 365-day year into 13 sets of 28 days each. This leaves one day to be held in no week or month at all, so that when the year begins again, it will always be the first day of the week, month, and year, all at once, a very nice and easy way to organize our daily lives.

If the standard of measure that we use is irregular, then we must contemplate deeply what this does to our mind over centuries of prolonged use."
- Jose Arguelles*

Resonant Moon

Month/Moon Seven: The Resonant Moon of Attunement • Resonant 1 - 28 = January 10 - February 6

7 is the master key to calendar change.

Throughout history and prehistory, the 7-day cycle has been a staple within the fabric of human consciousness. Seven days is approximately $\frac{1}{4}$ of the 28-day lunar cycle, or $\frac{1}{4}$ of the average menstrual cycle. One might argue that it is the Seven Days of Creation that established the 7-day week, but there is no argument regarding the fact that each month should be exactly four 7-day weeks, especially since 52 weeks of 7 days each is exactly the same as 13 months of 28 days each.

7, 13, and 28 are biological numbers.

There are 13 major articulations in the human body. The seventh articulation is the spine. The human energetic system contains seven primary energy centers that run through the spine. There are seven openings of the human head and seven glands of the human endocrine system. The female human body has 13 gates (seven plus two breasts, the navel, anus, urethra, and vagina) and normally 13 yearly menstrual cycles, each normally 28 days, affected by the Moon's 13 revolutions around the Earth each year. There are 28 phalanges (bone segments) in the two human hands and 28 phalanges in the two human feet!

7 is the middle number between 1 and 13.

The middle day of the year is day 183, which is Resonant 15, the solar return of Jose Arguelles. A common Jose Arguelles expression "4:7 :: 7:13," means "Four is to seven as seven is to thirteen." 4 is the middle number in the sequence, 1, 2, 3, 4, 5, 6, 7. Likewise, 7 is the middle number in the sequence, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13.

7 forms the most basic structural unit of the 13-Month, 28-Day Calendar, the 7-day week.

The 13-Month, 28-Day Calendar has these simple and basic structural properties:

7 days = 1 week

4 weeks = 1 month

13 months = 13 sets of 4 weeks = 52 weeks

Since 52 seven-day weeks is 364 days, another day is needed to complete the year. To make the calendar perpetual, the first day of the year is always the first day of the week, so the 365th day must not be in any week or month. This day is called the Day Out of Time (even though everything in third-dimensional form is in time, synchronized by time). The seven days of this calendar are named after seven radial plasmas. Plasmas are mixtures of ions and electrons. The ionosphere within Earth's upper atmosphere is itself a plasma. The seven radial plasmas used for the seven days of the week are:

Dali	days 1, 8, 15 and 22 (Dali targets)
Seli	days 2, 9, 16 and 23 (Seli flows)
Gamma	days 3, 10, 17, and 24 (Gamma pacifies)
Kali	days 4, 11, 18 and 25 (Kali establishes)
Alpha	days 5, 12, 19, and 26 (Alpha releases)
Limi	days 6, 13, 20 and 27 (Limi purifies)
Silio	days 7, 14, 21 and 28 (Silio discharges)

4 is the number of form, $4 \times 7 = 28$, and 28 is a perfect number.

Because $28 = 1 + 2 + 4 + 7 + 14$, it is a perfect number, by number theory definition. The sum of its divisors is equal to the number itself. There is much more to this mysterious and sacred number, yet it is simply seven doubled twice.

The 13-month, 28-day calendar honors the 7-day cycle. In fact, it depends upon it.

When the Vatican shut down the otherwise successful calendar reform that chose the 13-month, 28-day calendar in the early 1930s, they claimed that it was because the 365th day would break the sacred seven-day cycle of creation. Yet one of the solar calendars of the Maya, the Tun Uc, which means "Count of Seven," is a 13-month, 28-day calendar (with a different starting day). From the Maya perspective, this calendar honors the seven-day cycle. In fact, with a seven-day week, the only way that this calendar could have equal months is for there to be 13 of them. And to have equal months of 28 days, there would clearly need to be 13 sets of them. $52 \times 7 = 13 \times 28$. Without the seven-day week or the 28-day month, something like 73 five-day weeks would be a possible alternative. But then not only would the seven-day week be lost, so would the 28-day month. And a 73-day month would make little sense, as it would not measure the Moon at all, and as a prime number it can't have equal weeks. It is actually quite a blessing that 52 weeks is 364 of the 365 days of our trip around our Sun.

"An age of transformation: its guiding lights are the heretics and the visionaries who, seizing the opportunity, maintain a middle ground between futile revolution and blind materialism. These people are agents of conscious change vivifying the mass movements of humanity that come to characterize this period in the great cycle of ages. Through them the present situation is articulated and the groundwork of the future is laid. They are the few who retain a relatively healthy balance between psyche and techne, and who are thus able to create a vision of the direction of human events that responds to the deepest aspirations of our being."
- Jose Arguelles

Galactic Moon

Month/Moon Eight: The Galactic Moon of Integrity • Galactic 1 - 28 = February 7 - March 6

The calendar that a society chooses to use practically defines that society.

A group of people who have chosen to use a calendar and to coordinate their activities and their perception of nature and time according to it, with agreed upon holidays, customs, and belief systems, have basically agreed to form a society. If one intends to leave a society and form another, one should only need to leave one calendar for another. In this case, the society to leave is this 12:60-based one to form a society whose calendar is a natural human model, synchronized with both the Moon and the Sun, a lunar-solar calendar. In this sense, calendar change is truly revolutionary. It is important to remember that to leave a society via calendar change does not mean to leave the world and humanity behind. It is an act of personal conscious power and free will, and by reaching a collective critical mass, calendar change can certainly mean the complete change of what we know as modern society.

The 12:60 artificial timing frequency

In 1989, Jose Arguelles and his wife Lloydine were at the Museum of Time in Geneva, Switzerland when they had a deep realization that humanity is under the artificial time spell of the 12-month calendar and the 60-minute clock, the basis of the 12:60 artificial mental timing frequency. This led them to investigate the effects of the Gregorian calendar on human consciousness.

Calendar Reform and the Future of Civil-

ization, World Summit on Peace and Time

At the University for Peace, Costa Rica, Crystal 24 - Cosmic 1, 1999, the purpose of this summit was to formulate and propose a reform of the current world standard of daily timekeeping, the 12-month Gregorian calendar, replacing it with a perpetual calendar of 13 months of 28 days each.

In Preparatory Reflections for the World Summit on Peace and Time, Jose Arguelles wrote, "We see that a process conceived at the beginning of history - the division of a circle in space as a measure of time - received its complete fulfillment in the joint manifestation of the mechanical clock and the Gregorian calendar some 4500 years later in 1582. It is from this point that we can date the age of the machine. This is also the origin of the unconscious mental timing frequency, the 12:60 - irregular 12-month calendar and mechanistic 60-minute hour... When we speak of the 12:60, we are referring to an unconsciously incorporated timing frequency and time sense that is totally artificial and mechanistic and therefore at odds with the innate prevailing timing frequency governing the natural order of the human environment, the biosphere.

"Note the persistence of the 13-month, 28-day calendar: The Maya 13-month, 28-day calendar, Tun Uc, means "Count of Seven." Auguste Comte's Positivist calendar was derived from the Andean 13-month, 28-day calendar, Pachacuti. The Druid calendar has 13 months of 28 days each... Archeology in Japan shows that this calendar was

known to its ancestors. The 28-day cycle is seen in the traditions of the 28 lunar mansions of the Chinese and Hindus. 28 poles were used for the construction of the Lakota tipi. 28 is the mean number of days of the lunation cycle, and also the number of days it takes the Sun to rotate at its diameter. A point of returning to use of this calendar is that it corresponds to the female menstruation cycle, while possessing a profound harmony and regularity.

"If you have an uneven standard of measure, the uneven standard of measure is programmed in your mind. It's like creating a social order that has frustration built into it. That frustration creates different social forms, which also never arrive at a full achievement... So there are six billion humans who are dis-synchronized, dominated by a culture which uses a calendar that makes the mind crooked. This dominating culture is in the process of making things even more dis-synchronized. In chemistry there's a state called "brownian motion" in which all the particles are agitating. But they don't create a form of order. So six billion humans are all agitating, but they cannot create a whole consistent form of order that makes them happy. We can think of these six billion humans as little filaments of iron that are being agitated... The Law of Time is a magnet for the six billion agitating filaments. When you put that magnet in, then all the filaments go into order."

"Where there is peace, there is culture. Where there is culture, there is peace."
- Nicholas Roerich

Solar Moon

Month/Moon Nine: The Solar Moon of Intention • Solar 1 - 28 = March 7 - April 3

Nicholas Roerich and the Banner of Peace Pax Cultura - Peace through Culture

The Banner of Peace, with its distinctive symbol, was designed by the Russian artist, Nicholas Roerich (1874 - 1947) as an emblem for planetary peace, without distinction of nation states. As a teen-age amateur archeologist in the north of Russia, Roerich unearthed rare and beautiful ancient artifacts and realized that the best products of humanity's creative genius were almost always neglected, or even destroyed, by humanity itself.

In the early years of this century, he travelled through the historic towns of northern Russia, making paintings of their crumbling walls and deteriorating architecture. He then made appeals to the Russian government for efforts to maintain and restore these priceless links to the past.

Later it was the devastation of the first world war and the Russian Revolution that spurred his own efforts. He came to realize that the cultural heritage of each nation is in essence a world treasure. And his idea of cultural heritage broadened to include more than just the physical remains of earlier cultures, the buildings and art, for example, but also the creative activities, the universities, the libraries, the hospitals, the concert halls and theatres. All must be protected from the ravages of war and neglect, for without them life would be nothing but a rude and ignorant time on Earth. It became clear to Roerich that an international effort was required.

In the 1920's, Nicholas Roerich composed a treaty, with the assistance of international legal experts. This treaty became known as the Roerich Pact. It still legally exists today.

The Roerich Pact and Banner of Peace movement grew rapidly during the early 1930's with centers in a number of countries. The Roerich Pact declared the necessity for protection of the cultural product and activity of the world, during both war and peace, and prescribed the method by which all sites of cultural value would be declared neutral and protected, just as the Red Cross does with hospitals. Indeed, the Roerich Pact was often called the Red Cross of Culture.

Just as the Red Cross is embodied in a protective sign and banner, so does the Roerich Pact also designate a symbol to be displayed on a banner, the Banner of Peace. This Banner, flown at all sites of cultural activity and historical value, declares them as neutral, independent of combatant forces.

The Banner of Peace has ancient origins. Perhaps its earliest known example appears on Stone Age amulets: three dots, without the enclosing circle. Roerich came across numerous later examples in various parts of the world, and understood that it represented a sophisticated understanding of the triune nature of existence.

But for the purposes of the banner and the pact, Roerich described the circle as representing the totality of culture, with the three dots representing art, science, and spirituality, three of the most embracing of human cultural activities. Roerich also described the circle as representing the eternity of time, encompassing the past, present and future. The sacred origins of the symbol remain central to the meaning of the pact and banner today.

The Banner of Peace is associated with the 13-month, 28-day calendar change peace movement to indicate its cultural foundations, its political neutrality, and because of the natural, peaceful states of consciousness that the 13-month, 28-day calendar produces.

"You may say I'm a dreamer, but I'm not the only one, I hope someday you'll join us, and the world will live as one."
- John Lennon

Planetary Moon

Month/Moon Ten: The Planetary Moon of Manifestation • Planetary 1 - 28 = April 4 - May 1

Imagine. You can change the world.

On December 8, 1980 (Overtone 24), John Lennon was assassinated. But his immortality was secured. In the legacy of his art, one song stands out for its pure and radical vision, "Imagine." *"Imagine all the people living life in peace"* summarizes the vision of the 13-month, 28-day calendar change movement.

Because we can change the calendar, we can change the way we think on a global scale. If we can change the way we think, we can *"imagine all the people living life in peace."* Imagine there is a new standard of time, and imagine all the people living in natural time. The Law of Time affirms that by the nature of universal timing, the world is already as one. It is only the human race that has chosen separation. Our separation is thoroughly reinforced by our separation from nature in time, living by the clock and the irregular measure of the Gregorian calendar.

"Imagine there's no countries, nothing to kill or die for..." This very same calendar has institutionalized our need for differences, fortified by borders, money and war. The Law of Time affirms that birds fly without passports, dolphins swim without bank accounts, ants live without cell phones, and all of the cycles of the biosphere maintain themselves without frontiers. It is the maintenance of frontiers, fortified by money and warfare, that embeds even more deeply the institutionalized differences that keep us apart and disrupt the natural order. The Law of Time says that it is a belief system, embedded for 2000 years in the irregular measure of the Gregorian-Julian calendar, that has ingrained in us seemingly

insuperable inequalities and differences that maintain rich and poor, greed and hunger, keeping us from a sisterhood and brotherhood of woman and man.

Imagine changing global consciousness.

Please imagine that it is possible to change all of this, to change the calendar, because it is. All it takes is one person, and then one person more, and then one person more... And you can start now, you don't have to ask for permission. Take the Gregorian calendar off your wall and replace it with 13 moons of 28 days each. It's easy, as every 13-month, 28-day calendar has Gregorian dates included. The 13-month, 28-day calendars produced throughout the world over the past 30 years have the 12-month, Gregorian dates printed for each day, so that real calendar change is taking place. For a transition time, this requires use of both calendars. Awareness of the 12-month date is merged with awareness of the 13-month date, giving us 365 one-to-one correspondences to get used to. (Please see Crystal Moon.)

We are like fish in a dirty aquarium that have never known clean water. There are individual effects, and collective effects, related to calendar change. And it's not easy to say exactly what the effects really are. But globally we are returning to live in the environment of 13-month, 28-day consciousness once again.

A new time of peace on Earth

By invoking John Lennon's "Imagine," we are not shrinking from the fact that there are many obstacles of belief to overcome in attaining the goal of calendar change. And even after the calendar change has

been accepted and accomplished, we are not denying that there will not also be many obstacles and difficulties, as humanity, with its cumbersome institutions, begins to make the transition into the new time. But as has been said many times before, we have been able to mobilize for world war, why can't we mobilize for world peace? Why can't we mobilize for a new time?

We can change the calendar, imagine.

Calendar change provides a phenomenal opportunity for unification of purpose to attain a simple and pragmatic goal -- to change the calendar. What other peace plan has worked? What other universal peace plan is being put forth to address all humans on all issues of conflict, conflict with themselves and with their environment?

During the past three decades, there has been a new calling on all humans to support replacement of the Gregorian calendar with a new global civil standard, the 13-month, 28-day calendar. We come together in peace to implement a new global civil standard calendar. This calendar is for all beings. Because it is a 365-day solar calendar, it serves as a unifying tool, as it easily incorporates all other calendar systems, naturally and logically, with an equal standard of measure whose units are 28 days.

On Overtone 22 of this 2016/2017 year, GCCA, the Global Council for Calendar Awareness, launched its 13-month, 28-day calendar, establishing a harmonic standard for humanity that fosters a global culture of peace, in harmony with Nature's cycles, implemented by the people of Earth. (A referendum for change has begun for 2020. See Cosmic Moon.)

“Calendars have changed before to suit contemporary needs and philosophies. Some changes have been in the direction of simplifications and we have inherited the benefits; sometimes not. We have the same rights, the same incentives, and equal abilities, to better our customs, habits, and social structures. It is our duty to make them more fitted to our new world, not only for us but also for the sake of those to follow. Such mechanical things may seem insignificant and bothersome to make, but they have tremendous spiritual effects. To simplify our calendar may be a first step in taking hold of other things we have inherited, and that, although requiring change, we cannot change because we hold them in awe, or reverence, or by habit, or in fear. A new calendar for a new world is befitting the times.” – Enoch Karrer, 1942

Spectral Moon

Month/Moon Eleven: The Spectral Moon of Liberation • Spectral 1 - 28 = May 2 - May 29

Letting go of the old time is calendar change

The inertia surrounding the old calendar is immense. Despite the obvious beauty and elegance of the 13-month, 28-day calendar, the mere suggestion of change is met with disdain, disbelief and derision. Why is this?

You may understand that a harmonic standard of measurement produces harmony while an inharmonic standard of measurement produces disharmony, but are you still reluctant to change?

The deterioration of the biosphere has been accelerating out of control. The human species, alone of all the species, abides so much by the 12:60 timing frequency that the human species alone is the primary cause of the biospheric destruction. Something must be done about it sooner than later. Calendar change is the first step towards a whole system solution to a whole system disorder. But do you still resist?

The Gregorian calendar is a Vatican program

The Gregorian calendar is so internally self-defended and intricately convoluted as a system, so inextricably intermeshed in all of global civilization's functions and operations, that it cannot be reformed. It can only be replaced. Eliminate it once and for all, and replace it with a standard so new, and yet so harmonic and regular, that the difference will be immediately perceived. Eliminate the Gregorian calendar, along with its chaotic and debilitating effect on human intelligence.

The worldly power of the Vatican is shrinking as it desperately holds onto its power through but a single instrument, the calendar. Why should the Gregorian calendar, the mathematically flawed and biologically irregular measure of one religion, dominate the timing sensibility of the rest of the people on Earth? As fish in a 12-month, dirty-time calendar aquarium, we can replace it with one that is a demonstrable harmony synchronized with the natural order. In light of the failure of the previous calendar reform and in light of what has happened to the world since then, we dare be this outspoken. We know why the calendar has not been reformed.

Benefits of the 13-month, 28-day calendar

1. Each month has the same number of days, 28, so that the year has 13 equal months as its units, giving a measure of time that is an equal standard.
2. Each month is exactly four weeks, so every month begins on the first day of the week and ends on the last day of the week, and any given day of any month always occurs on the same day of the week. (The 4th, 11th, 18th, and 25th are always the fourth day of the week.) Hence, when you know the day of the month, you also know the day of the week! And if you know the day of the week, there are just four possible month dates!
3. The ease in calculating days, weeks and months reduces stress and frees time, instead of wasting time, while creating much greater potential for harmony in scheduling, time management, and even

business analysis, or any analysis of occurrences in time for that matter. Changes of anything are almost always measured in terms of change per time. And we've been measuring occurrences and changes in time with a crooked time lense, one with irregular and unequal units. It is crooked in its structure, and likely also in its intention. No other system of measurement known to humans has unequal units.

Disordered perceptions of time, materialism, and disorganized society are results of our use of the Gregorian calendar.

The Gregorian calendar is the underlying, controlling, Vatican instrument of the power establishment of the world. All of the Pope's pleas for morality and justice in the world are contradicted by the calendar which his corporate establishment, the Vatican, refuses to dissolve. It is ironic too that the Gregorian calendar, presumably the instrument of a spiritual order, the Catholic Church, generated from its irregular matrices such a profoundly and devastatingly materialistic science. But this was only inevitable after centuries of monks tinkering with algorithms and mechanical clocks to account for the inherent disordered perceptions of time produced by the calendar. What was established after the Gregorian calendar reform was a platform for scientists to apply their false analysis of time to the world, practically divorcing it from any natural time sensibility. The imperialism of Julian-Gregorian time easily translated into the materialist-capitalist imperialism over the natural world.

"Just as the biosphere is the unified field of life and its support systems, the region for the transformation of cosmic energy on Earth, so the noosphere is the unified field of the mind, the psychic reflection of the biosphere. Because we as a species, the aggregate of conscious-bearing cells of the evolving Earth, are yet awake to our role as a planetary organism, so too the noosphere is not yet fully conscious." - Jose Arguelles

Crystal Moon

Month/Moon Twelve: The Crystal Moon of Cooperation • Crystal 1 - 28 = May 30 - June 26

Calendar change, a bridge between worlds

By following a calendar that coordinates a society, your conscious reality is, in many ways, influenced by the customs and belief systems of that society. In particular, your conscious reality is largely affected by your perception of time and your perception and understanding of natural cycles in time, or lack thereof. In this simple yet profound way, your very perception of reality is affected by the calendar you choose to use.

Or did you even consciously choose a calendar in the first place? When you begin to realize that you never did, you may then begin to realize that you still have an opportunity to choose one for yourself. But be careful, for it may take you to a place you didn't know existed, a world coordinated by a different time sensibility, where sensibility comes naturally. Because there are currently countless people in more than 80 countries on Earth, who are, with varying discipline, following a 13-month, 28-day calendar that always begins on Gregorian July 26, there is another world, so to speak, within this Gregorian one. To escape from this Gregorian world in which you have always lived, you would need more than a change of your calendar, unless you can get everyone and everything you care about to leave this Gregorian world with you. For us, the large majority who care about humanity and this planet Earth, we can choose to live in both worlds during a transition time of understanding, patience, and free will. For some time, for now, we choose both, calendar cooperation, using two simultaneously, until humanity comes to its senses, in good time.

A world-bridger's guide to calendar change

The 13-month, 28-day calendar is a lunar calendar *and also a solar calendar of 365 days*. Each day of the Gregorian calendar is one and only one day of the 13-month, 28-day calendar, and visa versa, a one-to-one daily correspondence (with the exception of leap day, day 366. This calendar change is concerned with how to group the 365 days of the vague solar year as whole, equal weeks and months.)

As an optional aide, below are all 365 12-month to 13-month correspondences, with basic algebra for calculating the 13-month date, knowing the 12-month date, x or y.* For example, January 1 thru 9 is always the same as Rhythmic 20 thru 28. January 10 is Resonant 1. January 11 is Resonant 2. So subtract 9 from the January date to get the Resonant date, but only when it is both January and Resonant, of course. As stated above and below, the first nine days of January are in the Rhythmic Moon. For those days, add 19 days to get the Rhythmic date, January 8 is Rhythmic 27. But if you know it's January 13th, then subtract 9 to get the Resonant date, Resonant 4.

Jan 10-31 = Resonant 1-22

Jan y = Resonant (y minus 9).

In algebraic terms, if y = 13, then y - 9 = 4.

If the date is January 13, it is also Resonant 4.

Here are the 12- to 13-month relationships:

July 26-31 = Magnetic 1-6 year begins July 26

Aug 1-22 = Magnetic 7-28 Aug x = Magnetic (x + 6)

Aug 23-31 = Lunar 1-9 Aug y = Lunar (y - 22)

Sept 1-19 = Lunar 10-28 Sept x = Lunar (x + 9)

Sept 20-30 = Electric 1-11 Sept y = Electric (y - 19)

Oct 1-17 = Electric 12-28	Oct x = Electric (x + 1)1
Oct 18-31 = Selfex. 1-14	Oct y = Selfexist. (y - 17)
Nov 1-14 = Selfex. 15-28	Nov x = Selfexist. (x + 14)
Nov 15-30 = Overtone 1-16	Nov y = Overtone (y - 14)
Dec 1-12 = Overtone 17-28	Dec x = Overtone (x + 16)
Dec 13-31 = Rhythmic 1-19	Dec y = Rhythmic (y - 12)
Jan 1-9 = Rhythmic 20-28	Jan x = Rhythmic (x + 19)
Jan 10-31 = Resonant 1-22	Jan y = Resonant (y - 9)
Feb 1-6 = Resonant.23-28	Feb x = Resonant (x + 22)
Feb 7-28 = Galactic 1-22	Feb y = Galactic (y - 6)
March 1-6 = Galactic 23-28	Mar x = Galactic (x + 22)
March 7-31 = Solar 1-25	Mar y = Solar (y - 6)
Apr 1-3 = Solar 26-28	1st 3 April = last 3 Solar days
Apr 4-30 = Planetary 1-27	Apr y = Planetary (y - 3)
May 1 = Planetary 28	May begins, Planetary ends
May 2-29 = Spectral 1-28	May y = Spectral (y - 1)
May 30-31 = Crystal 1-2	end of May begins Crystal
June 1-26 = Crystal 3-28	June x = Crystal (x + 2)
June 27-30 = Cosmic 1-4	June ends, Cosmic begins
July 1-24 = Cosmic 5-28	July x = Cosmic (x + 4)
July 25 = Day Out of Time	like extra Sat at end of yr

* Note: x is used when Greg. date < 13-month date; y is used when the Greg. date > 13-month date.

Please use this guide to help you to learn how the two calendars correspond or correlate.

Every week, and every moon, begins with Dali (like Sunday) and ends with Silio (like Saturday). May we be the change we wish to see in the world. When we tell someone about an upcoming event, let's use both dates! If a show is October 10, add 11 and also say that it's Electric 21. They may look at you like you're from Mars, but here you are on Earth, tuning in to the Moon and to the Sun, simultaneously.

*"Among the Indigenous Peoples of North America, Earth is known as Turtle Island.
To remember that Earth is Turtle Island is to remember the way of the Earth guided by the cosmic power of thirteen moons." - Jose Arguelles*

Cosmic Moon

Month/Moon Thirteen: The Cosmic Moon of Presence • Cosmic 1 - 28 = June 27 - July 24

Returning to Natural Time, Turtle Time

All Indigenous Peoples of the Earth know and respect the wisdom and power of the turtle. Within turtle's shell is the knowledge of time and the wisdom of the thirteen moons. Turtle's wisdom is the power of cosmic knowledge. Thirteen scales make up the back of turtle's shell. It takes thirteen moons for Earth to go around the sun just once.

In the original time, turtle's wisdom was known by every child of the Earth. Every child knew that thirteen moons is the path to walk. It is the path of life that needs no explaining.

After the original time came the seeds and the planting. Then came the sword, and the forgetting. During the last four hundred years the Indigenous Peoples of the planet retreated deeper into the forest, the wilderness, the jungle. Wherever they went, they were followed by the machine and the twelve-month calendar of colonialism. Deprived of their own time, the Indigenous Peoples were forced into the false time of the machine.

Now, in 2016-2017 (Blue Spectral Storm Year), Indigenous Peoples from around the world have gathered in Turtle Island and all places to stand together in protection of the Mother, the biosphere. Once again the memory of thirteen moons has been released from turtle's back. One turtle scale for each moon, thirteen perfect moons of 28 days each. Four phases of the moon, four perfect weeks of seven days to every moon. Thirteen perfect moons, 52 perfect weeks, 364 days, plus a Day Out of Time every year.

This is the perfect wisdom of turtle's thirteen scales. The prophecy of Pacal Votan (603-683

AD), ancient Mayan prophet and sage states that humanity must return to living in natural time to reconstitute balance to the planet and restore the biosphere. This 'natural time' referred to is the 13-month, 28-day calendar evidenced in nature and followed by Indigenous Peoples the world over for several millennia.

The Thirteen Galactic Tones of Creation

Peoples of the Earth have always acknowledged their connection to the stars, reflected in their creation stories, cosmovisions, and cultures. The thirteen galactic tones of creation together form the cosmology of movement. The cosmology of movement is called a wavespell. A wavespell is any cycle of 13. 13 days, 13 moons, 13 years, etc

The Maya kept elaborate calendars to keep track of various celestial cycles and patterns of creative evolution, among them a 5,125-year (5,200-tun) cycle of 13 baktuns of 400 tun (~394 years) each, beginning in 3,113 BC and ending in 2012 AD. The 'Great Cycle' is an example of a wavespell.

Each month in the 13-month year, as with any wavespell, is correlated with a tone of creation, in sequence: Magnetic / Purpose; Lunar / Challenge Electric / Service; Self-Existing / Form; Overtone / Radiance; Rhythmic / Equality; Resonant / Attunement; Galactic / Integrity; Solar / Intention; Planetary / Manifestation; Spectral / Liberation; Crystal / Cooperation; and Cosmic / Presence. These galactic tones reflect a creative cycle, also reflected in a chromatic musical scale of 12 notes plus a thirteenth note making an octave.

A Lunar-Solar-Galactic Calendar: Our path back to the stars!

The annual start date for the 13-month, 28-day calendar is Magnetic 1 (always July 26). This start date is based on the heliacal rising of the brightest star in the night sky: Sirius, making it a lunar, solar, and galactic calendar. It takes approximately 52 years for Sirius B to orbit Sirius A, and our solar year has 52 weeks, a fractal of the 52-year cycle. $52 \times 7 = 364 + 1$ (Day out of Time) = 365. $365 \times 52 = 1$ orbit of Sirius B around Sirius A.

"To change and replace the calendar with the thirteen moon standard is to return us to our original purpose, leading us back to pathways of natural health. According to the law of time, the damage already inflicted in the time humanity last hesitated and lost the chance to alter its timing frequency, 40 years ago, has been incalculable. The final opportunity to change the calendar and the timing frequency is now upon us. Because of this we must be very clear and unshakable in our understanding and determination to expose and eliminate the current civil calendar for once and for all." -Jose Arguelles

"Each of the 13 moons has a power, action, and quality which define an annual program to synchronize our consciousness with stellar, solar and lunar cycles. As a perfect measure of cosmic time, this calendar is actually a SYNCHRONOMETER, an instrument for measuring synchronicity. Followed daily, it gives us a new lens in which to perceive events. IN THE NEW TIME, SYNCHRONICITY IS THE NORM!" -Stephanie South

TIPS FOR PRINTING YOUR OWN CALENDAR:

- + A laser printer will give very good results
- + When printing, select the “adjust to printer” or **“scale to fit”** option in the size output options, to avoid some cutting-off your print copies.
- + Look also in print options for the **“Print in both sides of the paper”** option, so that when stapling the sheets you have a real calendar in your hands.
- + Make sure you select the **“Long-edge binding”** option on the Layout print panel options, to ensure your copies come out facing each other.
- + You may run a test with the first 4 pages before printing the whole document, to check that it will be assembled correctly.

+ Once printed out, you can bind the pages at home/work. You can use a plastic binder clip or a stapler. If you really want it to look nice, we recommend to invest in paying for spiral binding at your favorite eco-print-shop. Have your wall calendar handy to use it as a personal planner or hang it on the wall. Write your appointments/personal reminders on it. Over time notice if you experience more harmony and balance in life...
